

Summary

Computer Science undergraduate building full-stack products across frontend, backend, applied AI, and geospatial visualization. Experienced building and deploying side projects with React, Node.js, Python, Gemini-based workflows, and Leaflet.js, focused on turning raw data into usable product experiences.

Education

NMAM Institute of Technology Nitte, India
B.Tech in Computer Science and Engineering 2023 – 2027 (Expected)
• **Relevant Coursework:** Object-Oriented Programming, Database Management Systems, Design & Analysis of Algorithms, Linear Algebra, Probability & Statistics.

Skills

Languages & Frameworks: Python, JS/TS, SQL, C++, React.js, Node.js, FastAPI, Express, Flask
Databases & Tools: PostgreSQL, SQLite, MongoDB, Vector DBs (Chroma/Pinecone), Git, Docker, Linux
AI & Geospatial: RAG, LangChain/LangGraph, Tool Calling, Pydantic (Structured JSON), Gemini API, Florence-2, Leaflet.js

TECHNICAL PROJECTS

- **AeroInsight: Geospatial Telemetry & Drone Fleet Agent:** Open-Source Project | [GitHub Repository](#)
 - **Production Deployment:** Shipped the application to production using **Vercel** (Frontend) and **Render** (Backend), configuring automated CI/CD pipelines via GitHub Actions to deploy updates on main-branch merges.
 - **End-to-End System Design:** Built a geospatial telemetry platform from initial concept, coordinating data structures between backend **SQLite** storage and map views based on flight log requirements.
 - **Geospatial & VLM Pipeline:** Used **Leaflet.js** to plot drone flight telemetry coordinates (GeoJSON), connecting a **Node.js** backend with the **Gemini API** to run Processed flight anomaly logs using an LLM-based reasoning agent
- **TrendPulse Pro: Financial NLP & Statistical Learning System:** Open-Source Project | [GitHub Repository](#)
 - **NLP Classification:** Built a sentiment analysis pipeline using **Naive Bayes** to classify sentiment across 1,000+ financial news articles.
 - **Statistical Signal Generation:** Designed trading signals using keyword-to-ticker mapping and rolling volume baselines, then backtested strategies with **Pandas** and **NumPy**.
- **Synthetix HRIS: Agentic Recruitment & Enterprise Management Suite:** Full-Stack Exploration Project | [GitHub Repository](#)
 - **Email Ingestion:** Built an automated email-ingestion pipeline using Python **imaplib** with a React + Flask interface for resume processing.
 - **Resume Processing:** Parsed structured PDF resumes, stored extracted fields in **SQLite**, and traced requests from email ingestion through backend processing to UI rendering.

Experience

- DLithe Consultancy Services Pvt. Ltd.** 8 Weeks
Artificial Intelligence & Machine Learning Intern
- Built an Indian Business CRM and AI Financial Advisor using React, TypeScript, Node.js, Express.js, and Google Gemini AI.
 - Developed K-Nearest Neighbors-based sales prediction and integrated AI-driven business recommendations and automated follow-up generation.
 - Implemented financial document and invoice processing workflows for structured data extraction and visualization.
- Association for Computing Machinery (ACM), NMAMIT** Nitte, India
Technical Committee Member Aug 2025 – Jun 2026
- Developed digital interfaces and visual assets for developer-focused events, coordinating with technical teams on event requirements and delivery.
